NEWS LETTER AUGUST 2008

Issue 6

With Tsubaki Transmission Chain, Conveyor Chain, Earthmoving Chain and Mechanical Power Transmission Components.

Tsubaki Australia began operations in 1982, distributing through a reseller network until 1986/87. In May 1987 we began operations fully in our own right, and are now in our 22nd year of operation as a wholly-owned subsidiary of Tsubakimoto Chain of Japan. We celebrate continual market support from resellers, distributors and most importantly you our final customers. Tsubakimoto chain is the world's largest manufacturer of roller chain and conveyor chain, with world certification and standards to ISO 9001, ISO9002 and ISO14001. Our global sales and manufacturing operations cover the Asia Pacific, America and Europe. Our company is a major supplier to the world's automotive market, with our chains being used in some of the most desirable cars, such as

Aston Martin, Range Rover and many more.

Our Product Line Up Includes:

Drive chain: ANSI and BS series.

Conveyor Chains: Metric and BS imperial

Welded Steel Chains: Timber mill

Top Chains: Plastic, Stainless Steel and Chain belting

PT Components: Sprockets, Gearboxes, Hypoid motors

Specialized PT: Cam Clutches, Power Cylinders, Linipower Screw Jacks

Earth Moving: Grader, Scraper, HDD and Trencher parts and components.

Engineering Support: Tsubaki have a range of specialized personal for our various product groups. One of the roles they fulfill include onsite evaluation to assist in the correct product selection. Please contact us here at GBS if you require any assistance and support.

Now in our 15th year of distributing Tsubaki we can assure you of the quality and range of products offered by Tsubaki are amongst the best in the world.

Please feel free to make an inquiry with us on any of these products.

With Summer fast approaching its an ideal time to check your Mower belts now and replace them ready for the season of mowing ahead!!!!

Here at GBS we carry the Gates range of Vee Belts including **POWER RATED BELTS** which are engineered for lawn and garden equipment, and light industrial drives in the 3 to 17 horsepower -

range. Special construction features provide smooth running, long lasting service on demanding applications that are subject to the demands of clutching, heavy shock loads and backside idlers.

Gates patented Flex-Weave® cover, made of a rubber and fabric, provide smooth clutching action, quiet operation and reduced vibration. The cover also protects the core of the belt from dirt, heat, ozone, chemical and oil damage.

Concave sidewalls distribute wear uniformly, rounded bottom corners assure proper tensile loading, and an arched top allows tensile members to carry loads evenly and relieve internal stress. An aramid fiber cord reinforcement (that is pound-for-pound stronger than steel) resists the effects of shock loads and provides length stability.

Give us a call today to get your belts in time for Summer!

Monthly Special

Circlip Plier Pack Specials Still On!

Only avail until end of August 08

Kits are available in 2 sizes.

PLIERSETC1

4 Pairs @ 125mm Range 9-17mm
