NEWS LETTER SEPTEMBER 2008

Amazing Plastics!

Issue 7

CUT TO SIZE plastics

Plastics have been the fastest growing basic material because they are Versatile, Lightweight, Tough, Energy saving, Low cost, Durable and Recyclable!!

We can supply cut to size machined or fabricate the finest engineering plastics to your specifications.

From heavy industry, Retail, Advertising, Packaging, Food & Beverage, Mills, Marine, Farming, Timber or Mining there is a plastic to suit your requirements.

Our range of plastics can be cut, sawn, drilled, milled, turned, bent, polished and fabricated to your specifications.

Our Product Range Includes

General Plastics- Acrylic, Polycarbonate, Polypropylene, PVC, HDPE & LDPE.

Engineering Plastics

- Wearnlon™ (Nylon), Wearace™ (acetal), Wearflon™ (PTFE), Wearex™ (UHMWPE), Wearthane™ (Polyurethane), 3M Scotchply™, Nylon X-lube bushes™, Chanex Timber Products, PETP & PETP-GL. Most Materials are available in Rod, Sheet and Tube form.

Plastic can be used in most applications where metal and wood have been traditionally used and have large cost savings through harder wearing properties. Plastic parts can prolong the life of machinery, reduce running costs and increase efficiency in production lines.

Wearstrips, Profiles, Starwheels, Guards, Sprockets, Compact Curves, Bushes, Rollers, Vibratory Springs, Machine Guards, Scrapers, Sprockets, Chute Liners, Windows, Hatches, Anchors, Chain-Rollers, Rudder Bearings & Conveyor Flights. These are just some examples of the many uses for our plastic products.

Suppliers-

To ensure the highest quality products, our supplier sources materials from ISO certified suppliers from around the world.

So next time you just need plastics or have a troublesome application maybe our range of plastics is the solution....

Monthly Special

TIMKEN

Where You Turn

Wheel Kit 4 Pack + Stubby Cooler!

These Wheel Bearing kits suit Toyota Landcruiser Front and Rear Wheel 1969 to 1999.

They also suit some front wheels on Toyota Hi-Ace, Hi-Lux and Dyna. Please confirm with us before ordering.

Polycarbonate Feature Plastic for September

Also known as SafeGuard

Polycarbonate is available as sheets, rods and tubes. It is usually clear, but an opal sheet for lighting is also stocked. It is used as an impact resistant glazing material. We have a range of Lexan brand and commercial polycarbonates available. Sheets are stocked in standard or U.V. protected grade.

All factories need machine guards and these are our specialty. We bend and form polycarbonate to suit your machinery. We have this available from 3 mm clear up to 12.5 mm for security windows and protection areas. Available in sheet size up to 2440mmx1220mm thickness 1.5mm to 12mm.

Rod up 100mm in diameter and tube 6mmx3mm to 127mmx124mm. Remember we can cut, bend, drill, tap and shape to you requirements. State of the art CNC equipment means we can meet you requirements. Please feel free to contact us regarding Polycarbonate or any other inquiry

\$150.00 +GST

You may have regarding any of our plastics range. We can post or email you product info as required.
