## NEWS LETTER OCTOBER 2008

Issue 8

LOCTITE LOCTITE LOCTITE LOCTITE LOCTITE LOCTITE

### Finding Better Ways 50 Years of Innovation

Loctite Corporation began in the Trinity College basement laboratory of Dr. Vernon Kriehle of Hartford, Connecticut in 1953.

The promise of solving the age-old problem of loose nuts and bolts in machines and appliances – a problem customers had long ago accepted as unsolvable led to an incredible flow of inquiries.

Loctite grew rapidly. In 1956, sales totalled US\$ 7,000 though net income was at a deficit of US\$ 17,000. From 1971 to 1975, sales again quadrupled - to US\$ 67 million.

To fuel its growth, Loctite allocated an increasing amount of money to research and development and to the strategic acquisition of other, related companies

Throughout its history, Loctite has continuously created markets by discovering opportunities where no one knew they existed. From its founding, based on a product that solved an "unsolvable" problem, Loctite has achieved success through innovation.

Fifty years of success has made Loctite® the world leader in the development and manufacture of high-performance adhesives, sealants and chemical products:

Success based on experience, leadership and technical innovation.

The commitment of Loctite to research and development has resulted in the most technically advanced range of products available today. Products that speed manufacturing processes, reduce costs and improve quality throughout industry. Products for global use that comfortably exceed national and international standards.

Loctite offers a complete range of specialised product application and dispensing equipment, designed to complement modern manufacturing methods, and reduce wastage.

Loctite anaerobic, cyanoacrylate, and silicone adhesives and sealants are at the leading edge of chemicals technology, with a broad product range including special product programs for many industries such as Automotive, Electronics and Medical Devices.

Loctite® products for maintenance, repair and overhaul needs, including: adhesives, Anti-Seize, anti-slip coatings, belt repair, cleaners, coatings, epoxies, flooring & grout, gasketing & sealing, hand cleaners, lubricants, machining compounds, retaining, sealing cord, thread locking, thread sealants, wearing compounds, and other

special products are all available through GBS.

Around the world, automotive manufacturers rely on the features and quality of Loctite products to add reliability to motor cars, motor cycles, marine engines and machinery that they produce.

Loctite are proud to be Official Suppliers of Team McLaren Mercedes - one of the greatest teams in motorsport.

Computers, automobiles, airplanes, vacuum cleaners, mobile phones, and medical devices are just some of the many items that are made with Loctite® products. Loctite also offers standard and custom-built dispensing and application equipment.

Loctite is in the business of solving customers' problems. When customers buy Loctite®, they get more than a product- they get a partner who will work side by side with them to find innovative solutions to their manufacturing problems.

Gympie Bearings and Loctite your one stop shop for Sealing and Adhesive solutions and Innovative products!

### LOCTITE HAND CLEANER SPECIALS

Why use LOCTITE Yuk Off Orange?
