NEWS LETTER MARCH 2009

WELCOME TO 2009

WELCOME BACK EVERYONE

Hope you all survived the silly season. During the short break that we had we created a Website -

www.gympiebearings.com.au

Please all feel free to view and leave feedback for us about the website so we can make improvements.

You will find links to our suppliers and we will update regularly with new products and articles.

Save on your Next Auto Service!

Why not Save some \$\$ on your next Auto Service and buy any of the following products you may need from us before dropping your car into a work shop!

You will be getting leading brand products many of which are supplied to O.E dealers and manufacturers.

WHEEL BEARING HUBS

If you are not aware the Automotive Industry are now moving towards HUB UNITS in the front and rear wheels of most of their models to replace taper and ball bearings.

Holden Commodores and Ford falcons are one of the most popular users of these to date with many other manufacturers going down the same track!

We now stock some of these hub units at a very competitive price.

DIFF KITS

Gympie Bearings is able to supply complete diff kits for most 4WD and rear wheel drive vehicles.

Most of our kits contain pinion bearings, side carrier bearings, seal, Gasket and Collapsible spacer (if appli-

cable).

We have a large stock of the 4WD type on the shelf. If we don't have in stock we can usually have the next day.

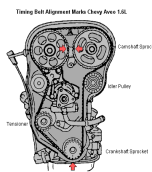

GEARBOX KITS

We have an extensive range of Gearbox and Transfer Case kits for most vehicles.

Our kits are able to be bought Complete including all gaskets, nuts, bearings, seals and needle rollers or we can offer a SHORT kit which includes only the bearings, seals and gaskets at a reduced cost to a full kit.

Timing Tensioner Kits

Our Timing Tensioner kits contain quality Tensioner and Idler Bearings, Gates Timing and Cam Shaft Belts and Oil Seals. Avoid costly engine damage and change regularly.

WHERE IS THE WORLD HEADED?

The global Economy and currency fluctuations are now effecting some pricing on certain products based on country of manufacture. We are doing all with in our powers to absorb as much of the increase as possible but there are increases we can not absorb and must pass on. Our principle product line NTN is predominately sourced from Japan and the Yen Vs Australian dollar has been on of the -

Hardest hit.

We all hope that things improve in the coming months to alleviate some of these pressures.

As always we are happy to discuss any concerns or question you may have in this area.

Gympie Bearing Supplies helping the community!

On the 2nd August 2008 a charity ball was held in the Gympie Show Pavilion. The ball had in excess of 300 guests and the money raised was donated to the SCIC foundation. The SUPPORTING CHEMO IN COOLOOLA charity was started 3 years ago by Marlene Owen, the wife of Gordon the proprietor of Gympie Bearing Supplies.

Gordon and Marlene Owen were the event planners behind the charity ball. Without the help of themselves and the Gympie community the ball wouldn't have been possible. Each and every decoration that was on show at the ball including masks and roof decorations were all handmade. Gordon even created the water fountain himself! They raised a total of \$100k and the money will go toward the cost of building 10 units for patients and family during chemo treatment.
