NEWS LETTER JUNE 2009

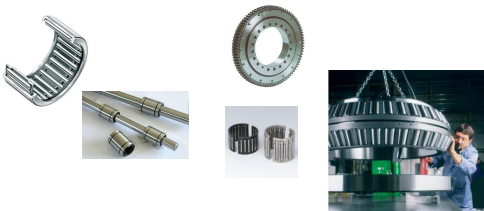

SCHAEFFLER GROUP

Schaeffler Group is a leading worldwide supplier of roller bearings, Spherical plain bearings, Plain bearings, Linear products, accessories specific to bearings and comprehensive maintenance products and services. With such brands as **INA** and **FAG**.

INA is one of the world leaders in Needle roller, Cylindrical and Roller clutch Bearings. These Bearings are used for a large range of applications such as Gearboxes, Heavy machinery like cranes and Drag Lines. Other products that **INA** produce are Slew Rings, Timing Tensioner Bearings and also Track Rollers.

FAG is one of Europe's leading producers of Bearings. FAG has one of the widest product portfolios in the rolling bearing industry, covering nearly all areas of consumer products.

FAG produce ball bearings of all diameters starting as small as 3 millimetres to 4.25 meters. Together with **INA**, **FAG** offers customers comprehensive support and services for the diagnosis, maintenance and mounting of rolling bearings and complete systems.

SPEEDI-SLEEVES

"From worn to Restored in less than 5 minutes."

CR Speedi-Sleeves are your cost-effective alternative to re-sizing, remetalising or replacing the severely damaged shaft surface as it installs easily, with minimum machine downtime. Speedi-Sleeves are available for shaft diameters ranging from 12mm to 200mm. To determine the correct size Speedi-sleeve measure the undamaged section of the seal surface.

GOSSIP CORNER

Owners Gordon & Marlene Owen have just returned from Japan. They visited some of the major Japanese bearing producers, To gain knowledge and see the latest technology in the ever expanding world of bearings and chain.

They were very happy with the way the future looks with our leading suppliers of products.

They also did a bit of site seeing. They looked at Hiroshima, Osaka, Tokyo and the Toyota

- LCD display
- Range -20C to 320C
- Laser on/off switch

Come in and check the great deals today!

Noncontact (IR) Scanning Thermometer

- Range: -20°C to 320°C
- LCD display
- Laser target
- Auto power off
- On/Off function
- Range: -20°C to 320°C
- Accuracy: ±0.5°C (non-contact)
- Up to 16 hours battery life (continuous)
- Compact and easy to use
- Simple one-handed operation

Innovation in Motion TSUBAKI CHAIN Innovation in Motion TSUBAKI

"AT TSUBAKI THE FUTURE IS NOW"

Because of its long tradition of quality, the **Tsubaki** name has become a world renowned mark of assurance in the industry. **Tsubaki** have been producing Chain for over 80 years. This is why Gympie Bearing supplies has full confidence in supplying there products.

Tsubaki Australia commenced direct operations in Australia in 1987 and since then has expanded throughout Australia. **Tsubaki** is the world leader in the production of steel roller and conveyor chain.

Tsubaki has been at the forefront of development of **Plastic Chain** which is used in a wide range of industries for a variety of applications including Can conveyors, PET bottles, Glass bottles and Cartons.

Tsubaki Earthmoving products. We are able to supply a full range of Ballantine elevating scraper and trencher chain.

Innovation at **Tsubaki** doesn't stop with Chain, included is an extensive range of Power Transmission products such as motion controls, linear actuators, screw jacks, one way clutches & variable speed drives to name a few.
